

NICHOLSON PLASTICS LTD

Custom Moulded Solutions

Nicholson Plastics has been recognised since 1968 as one of the leading GRP moulders in the UK. However the time has come to take a fresh look at what can be achieved with modern composites. Your custom moulded needs will be met by our complete service, taking your ideas through to supply and installation. Our in house experience and facilities include:

- Design Consultation
- Pattern & Mould Making
- Manufacture & Assembly
- Delivery & Installation

Sectors where our products can be used:

Architectural

Construction

Civil Engineering

Manufacturing & Engineering

Government Establishments

Agriculture

Marine

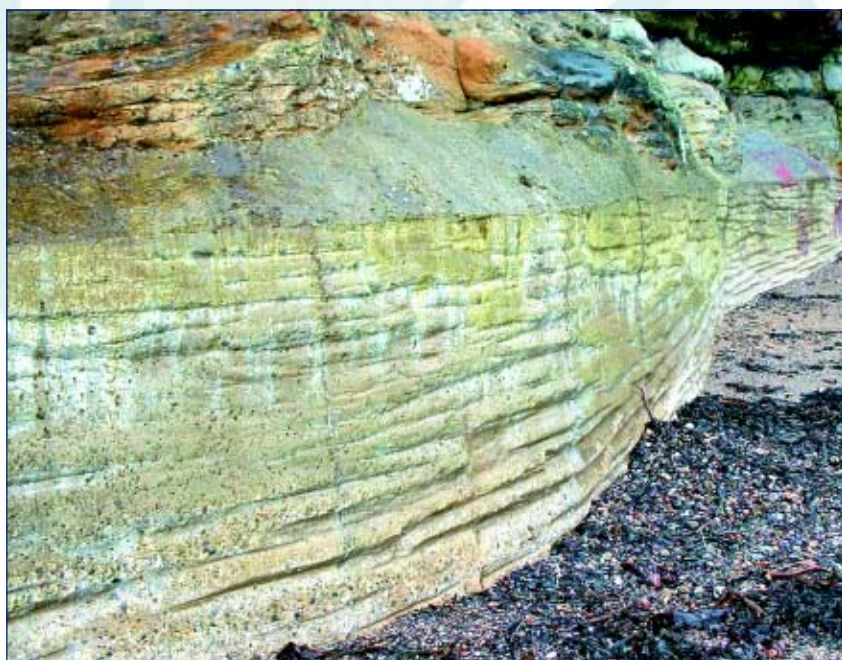

Water Treatment

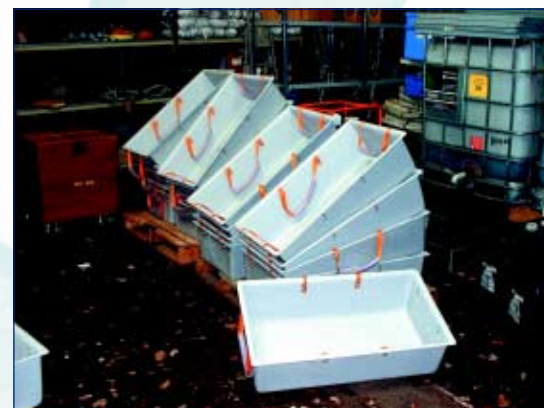

Bronze effect sculpture

Simulated stone balustrades & finials

Concrete underpinning cast against composite formwork

Equipment boxes for emergency services

We have included some examples of what can be achieved using moulds from composites in the real world. By no means is this exhaustive, but merely a selection of what has already been realised.

*original carving by Malcolm Robertson.

Specialists in Modern Composites

Why Choose Composites?

GRP cladding panels

Pediment features in lightweight composite
