

# TECHNOTRAK SAFETYCROSS

The Safety Cross is a highly versatile and safe trench cover designed for covering apertures, bores or trenches during maintenance, construction and repair projects.

The covers allow safe access and passage over and around site excavations. Approved by the majority of local authorities and utility companies, they are a highly cost effective solution to site safety and access, in compliance with the UK's Safety at Street Works and Road Works code of practice.

Installation is quick and simple by either fixing pins ideal for bitumen surfaces, or butyl adhesive developed for stone or concrete surfaces

- **Manufactured from glass reinforced plastic, the products have no scrap value thus eliminating on-site theft problems**
- **Product neither warps or delaminates in adverse weather conditions**
- **High non-slip surface - even in the wet**
- **Light vehicular access to private driveways is easily maintained**
- **Improved public relations (smart appearance & high safety levels)**
- **Embedded with permanent corporate logos, high visibility colours and reflective markings make them quite simply the safest products available on the market**
- **Easy to clean and maintain**

# TECHNOTRAK SAFETY CROSS SPECIFICATIONS

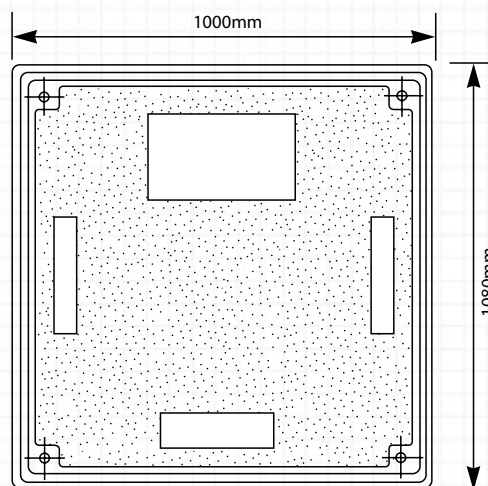

**APPLICATIONS** The Safety Cross is designed to cover excavations of up to 800mm in the case of a trench, or an excavation of up to 800mm x 800mm square.

**WEIGHT** 1m Safety Cross - 16kg

- SAFETY**
- High strength
  - Non trip - 3mm leading edge
  - High non-slip surface, even when wet
  - Lightweight, for ease of use
  - Raised central apex creating four upwardly sloping triangular surface panels to allow for water drainage
  - Recessed fixing and rubber feet to allow safe installation and prevent movement
